Fund description

This fund aims to provide passive exposure to developed world equity performance. It does this by investing passively in a fund which aims to track the performance of a developed markets equity index. The fund is an Article 8 fund under the Sustainable Finance Disclosure Regulations (SFDR), which means it promotes environmentally friendly or socially responsible investments.

Risk Rating

This fund has a risk rating of 6. Before you invest in this fund, or any fund, it is important that you speak with your AIB Advisor to ensure you understand and are comfortable with the risks involved. Details of the risks of investing in a fund are explained in our Fund Guide which is available from your AIB Advisor.

Notes: Annual management charges (AMC) apply. The fund performance shown is before the full AMC is applied on your policy.

Warning: Past performance is not a reliable guide to future performance

Warning: The value of your investment may go down as well as up

Warning: If you invest in this fund you may lose some or all of the money you invest

Warning: This fund may be affected by changes in currency exchange rates.

Responsible Investing

In line with the overall fund objective, the fund targets investment in strategies which help contribute to achieving its sustainability goals. This involves selecting strategies which exclude or reduce exposure to companies with poorer sustainability characteristics and increasing exposure to companies with better sustainability characteristics. Sustainability characteristics are also considered in the selection of property and alternative funds.

The Environmental, Social & Governance (ESG) Risk Rating measures the degree to which a company's economic value is at risk due to not considering ESG factors using a calculation of the company's unmanaged ESG risks.

Fossil Fuel Involvement measures the percentage of earnings that companies get from thermal coal extraction, coal-based power generation, oil and gas production, oil and gas based power generation, and oil and gas related products and services.

Carbon intensity is a metric used to compare company emissions across industries. The absolute emissions is divided by total earnings with the figure expressed in tonnes of carbon dioxide equivalent per million USD of total earnings.

ESG Score

CHARACTERISTIC	FUND	BENCHMARK
OVERALL ESG RISK	18.6	20.1
FOSSIL FUEL	7.0	8.8
CARBON INTENSITY	60.8	99.3

Note that ESG scores are currently only calculated for equities and corporate bonds. A lower score indicates a lower level of unmanaged ESG risk and a lower level of potential risk to the economic value.
