FUND MANAGER	Multi-manager
ASSET MIX	Alternatives
INVESTMENT STYLE	Active

Fund description

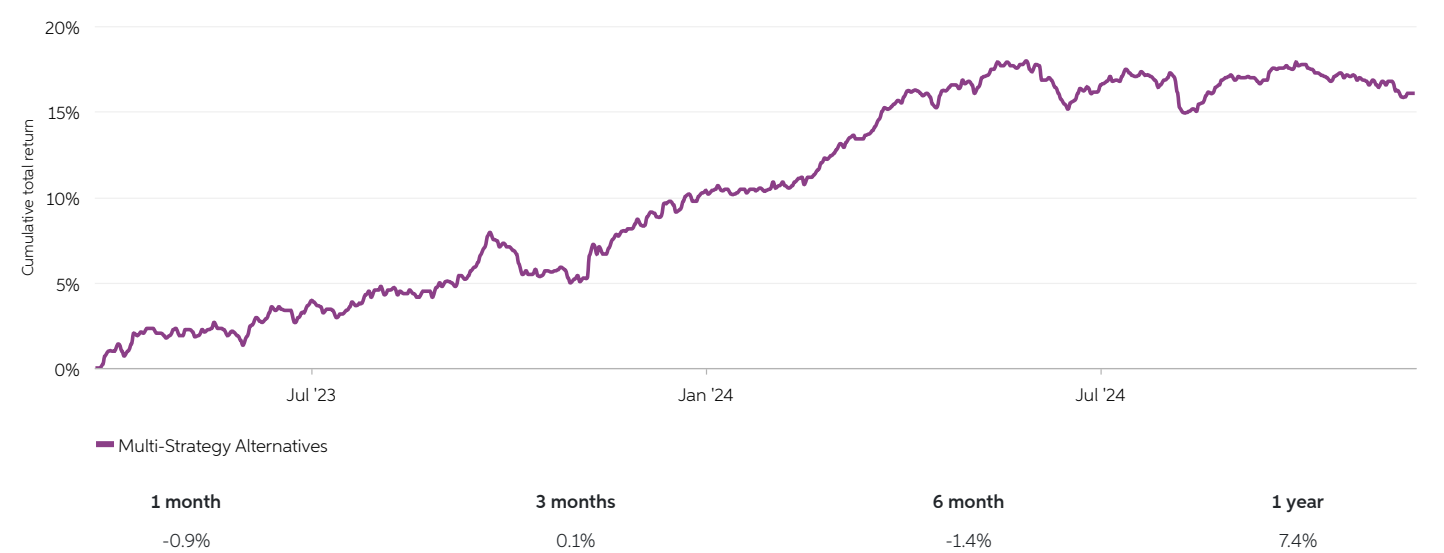

This fund aims to achieve returns while being an alternative to equity and bond market exposure. It does this by investing in a portfolio of funds which aren't tied to equity and bond markets. The portfolio is diversified across different investment strategies which deliver diversifying return streams, blended across income-generating strategies, risk premia and protective elements. The fund invests in a portfolio of funds managed by a range of fund managers who specialise in skill based or alternative market returns. These are selected and monitored by ILIM, and the underlying funds will be changed from time to time where they feel there is an opportunity to improve the risk or return characteristics of the fund.

Risk Rating

This fund has a risk rating of 3. Before you invest in this fund, or any fund, it is important that you speak with your AIB Advisor to ensure you understand and are comfortable with the risks involved. Details of the risks of investing in a fund are explained in our Fund Guide which is available from your AIB Advisor.

Performance to 18/11/2024

Notes: Annual management charges (AMC) apply. The fund performance shown is before the full AMC is applied on your policy.

Warning: Past performance is not a reliable guide to future performance

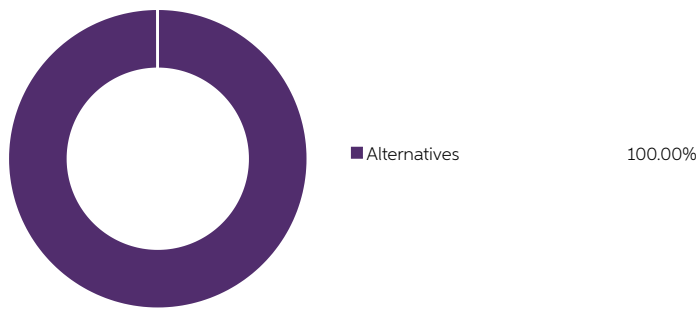

Warning: The value of your investment may go down as well as up

Warning: If you invest in this fund you may lose some or all of the money you invest

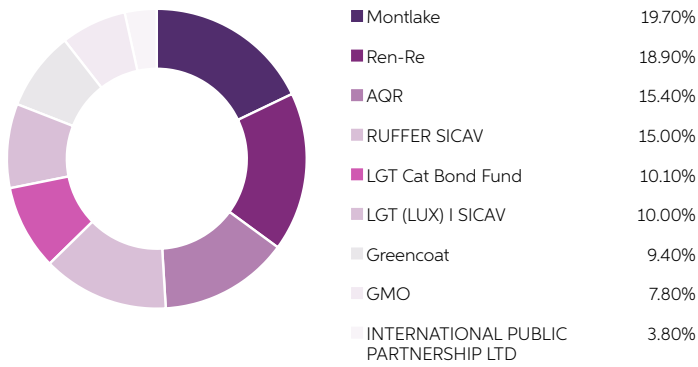

Warning: This fund may be affected by changes in currency exchange rates.
